Technology

The traditional world of network and cable television is in decline, with ratings slumping and subscribers shrinking. It's a big iceberg, and it's melting slowly, but the trajectory is clear. At the same time, however, a new breed of programming that in many ways looks and feels like television is blossoming online.

Smart TV App (Roku)

Technology has allowed broadcasting to millions of viewers at low prices compared to the traditional satellite television. The company intends to release an android application that will give people access to video and audio Christian materials via smart TVs and smart phones. Research in this area has already began and showing huge opportunities that exist in this field.

What is Roku?

Roku is a small, set-top box that connects your TV to the Internet. The Roku box allows access to a wide variety of entertainment that typically isn't available through cable or broadcast television.

With 22 million active accounts as of June 2018, a Roku device or Roku-enabled smart TV is the main way that U.S. households stream TV shows and movies. *Source : cnbc.com*
